STEP 1 - VET THE SUPPLIER

- Ask how the material was cured, stored, trimmed, and levels of inventory
- Find out if they are the actual hemp farm, CBD distributor or a broker
- Request test results with high quality pictures and videos of the material in bulk
- Conduct a site visit when possible or request a live video conference

STEP 2 - TRY BEFORE YOU BUY

- Order samples before making a bulk purchase to confirm quality in real life
- Triple verify that your bulk order will be the same exact material and condition as the sample prior to placing the bulk order
- Do not make impulse buys based on price or emotion
- Find suppliers that stand behind their products with a promise or guarantee

STEP 3 – ESTABLISH STRATEGIC RELATIONSHIPS

- Know your customer and exactly what they are seeking, then provide a solution
- Identify the raw material suppliers, product manufacturers, hemp processing labs, and testing labs
- Ask about certifications such as CGMP, GMP, certified organic
- Find established suppliers who have consistent quality, fair market pricing and exceptional customer service
